Safety Policy for Shree Shantinath Enterprises

Building and Construction SectorNIC Code: 41002

Introduction and Purpose

Shree Shantinath Enterprises is committed to ensuring the highest standards of health and safety for all employees, contractors, visitors, and stakeholders on all construction sites.

This policy outlines the framework to prevent accidents, injuries, and occupational illnesses in compliance with applicable laws and industry best practices. Our goal is zero harm through proactive risk management and continuous safety improvement.

Prevent Accidents

Minimising risks and ensuring a safe working environment.

Ensure Compliance

Adhering to all legal and industry safety standards.

Continuous Improvement

Always seeking better ways to enhance safety protocols.

Scope and Applicability

This policy applies to all employees, subcontractors, suppliers, and visitors engaged in or visiting Shree Shantinath Enterprises' construction projects.

It covers all phases of construction activities including site preparation, building, installation, and maintenance, encompassing all company locations and project sites under the NIC 41002 classification.

All Personnel	All Project Phases	All Company Sites
Employees, contractors, visitors.	From preparation to maintenance.	Across all construction locations.

Roles and Responsibilities

Effective safety management relies on clear responsibilities at every level of the organisation. Each role plays a crucial part in maintaining a safe work environment.

Management

Provide resources, training, and lead by example.

Site Supervisors

Conduct briefings, enforce PPE, monitor compliance.

Employees & Contractors

Follow procedures, report conditions, participate in training.

Safety Officer

Oversee risk assessments, incident investigations, audits.

Risk Assessment and Hazard Control

Comprehensive risk assessments are conducted before project commencement and regularly during operations to proactively identify and mitigate potential dangers.

Hazards such as falls from height, electrical risks, machinery operation, and material handling are systematically identified. Control measures, including engineering controls, administrative controls, and personal protective equipment (PPE), are then implemented to minimise risks. A hazard register is maintained and updated to reflect new risks or incidents.

Identify

Recognise potential dangers.

Assess

Evaluate the severity and likelihood.

Monitor

Review effectiveness regularly.

Control

Implement mitigating actions.

Personal Protective Equipment (PPE)

The mandatory use of appropriate PPE is a cornerstone of our safety policy. This includes helmets, safety boots, high-visibility clothing, gloves, eye protection, and harnesses where applicable.

All PPE must meet national and international safety standards. Regular inspection, maintenance, and replacement are crucial to ensure its ongoing effectiveness. Comprehensive training on the correct use and disposal of PPE is provided to all personnel.

- Your safety is our priority. Always wear appropriate PPE.

Training and Competency

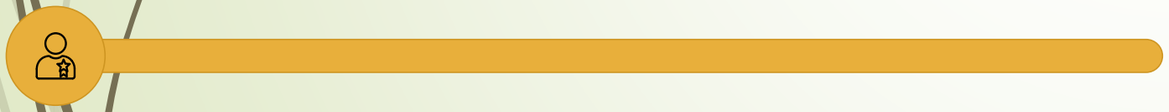

We are committed to fostering a highly skilled and safety-conscious workforce. Induction training is provided for all new employees and contractors, covering site-specific hazards and safety procedures. This ensures everyone understands their role in maintaining a safe environment.

Regular refresher courses and toolbox talks reinforce our safety culture, keeping vital information top-of-mind. Specialized training is also provided for high-risk activities such as working at heights, operating heavy machinery, and electrical safety, ensuring competence where it matters most. All training records and certifications are meticulously maintained.

Induction

Site-specific hazards & procedures.

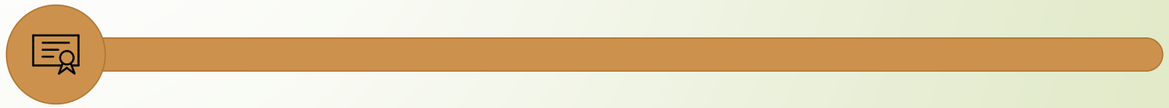

Specialised Training

High-risk activity competence.

Refresher Courses

Reinforcing safety culture regularly.

Certification

Maintaining training records & competency.

Incident Reporting and Emergency Procedures

Immediate reporting of all accidents, near misses, and unsafe conditions to site supervisors and safety officers is mandatory. This allows for prompt action and thorough investigation to identify root causes and prevent recurrence.

Robust emergency response plans are in place, including clearly marked evacuation routes, readily available first aid facilities, and established communication protocols. Regular emergency drills and updates to these procedures ensure that all personnel are prepared to act swiftly and effectively in any emergency situation.

Report Incidents

- Accidents
- Near Misses
- Unsafe Conditions

Emergency Readiness

- Evacuation Routes
- First Aid Facilities
- Communication Protocols

Health and Welfare Provisions

Shree Shantinath Enterprises prioritises the health and welfare of all personnel on site. We provide clean drinking water, adequate sanitation facilities, and designated rest areas to ensure comfort and hygiene.

Worker health is monitored through periodic medical check-ups. Policies are in place to effectively manage fatigue, heat stress, and exposure to hazardous substances. Furthermore, we actively support mental health and wellbeing initiatives, recognising their importance in a demanding work environment.

Hydration

Clean drinking water available.

Rest Facilities

Designated rest & sanitation zones.

Health Checks

Periodic medical assessments.

Wellbeing

Support for mental health.

Continuous Improvement and Compliance

Our commitment to safety is ongoing. Regular internal and external safety audits are conducted to ensure full compliance with legal and company standards. We utilise safety performance indicators and feedback mechanisms to drive continuous improvements in our safety protocols and practices.

Shree Shantinath Enterprises is dedicated to adopting new technologies and innovative practices that enhance safety across all operations. Our safety policy undergoes an annual review and update to reflect any changes in legislation, technology, and operational experience, ensuring it remains current and effective.

This dynamic approach guarantees that we consistently uphold the highest standards of safety and welfare for everyone involved in our projects.
